

BONE COVER

For reducing or eliminating “leakers” of bone-in meat cuts packed in vacuum or shrink bags

Those difficult to pack bone-in meat cuts, are now a whole lot easier and more cost effective using Bonecover™. Deliver your valuable product in perfect condition, everytime. Available in rolls or sheets. These step by step pictures just show how easy Bonecover™ is to apply, even to difficult-to-protect products.

PAGE NO.

Bonecover™ benefits people in the food industry by making them both more efficient and more effective. Greatly reduced leakers means greatly improved efficiencies because there is no rework. Rework is double packaging and double labour for no return at all.

Other benefits include:

- ✓ Extreme puncture-resistance, adheres to and conforms to the meat for ease of packing.
- ✓ Perforated-on-roll (Code “-P”), Separate sheets (Code “-S”), Continuous Roll (Code “00-R”) non-perforated.
- ✓ High-performance non-woven fabric impregnated with food-compatible wax. Available in white or black.
- ✓ Extreme puncture-resistance means in-plant “leakers” can be eliminated.
- ✓ Wrap BoneCover™ over the sharp points, then pack in standard shrink bag
- ✓ Does not support bacterial or fungal growth - for longer product shelf life.

See over for sizes and order codes.
